Be sure to leave with the owner when installation is complete.

California Proposition 65

⚠ WARNING ⚠

Engine exhaust, some of its constituents, certain vehicle components and fluids, contain or emit chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

revised: 4-11-2017

1. WIPER INSTALLATION

1.1 Per fig. 1.1, mount the wiper motor and the flat cover plate to the inside surface of the windshield. **CAUTION:** The inside surface of the windshield is coated with a plasticized safety film. Use care to avoid scratching the inside surface.

Sandwich the windshield where shown. Orient the bosses on the left-most plastic washers as shown (pointing towards the windshield location/placement). **NOTE:** if the bosses do not fit into the holes in the windshield, the installation can still be completed as is.

1.2 At the installer's discretion, create an opening (a vertical rectangle) in the dash for the switch to mount into.

1.3 At the installer's discretion, run the wiring harness neatly along the upper windshield support and down the front ROPS tubing and eventually connecting to the vehicle's battery.
